

Course Care

Bunkers

- Before leaving a bunker, a player should carefully fill up and smooth over all holes and footprints, and then leave the rake with the handle pointing toward the tee of the hole being played.
- Always enter the bunker at the lowest point.
- Pull rake toward you as you exit the bunker.
- If required, rake other affected areas.
- Do not pile sand at the edge of the bunker. Push back excess sand.
- Do not rake the face of the bunker. Smooth out with the back of rake.

Bunker Rake Policy

- Always leave rake in the flat of the bunker with the handle parallel to the line of flight of the hole being played with the handle pointing back towards the tee.
- Rakes should be placed as far from the edge as possible.

Repairing Ball Marks

- Always start at the back of the mark and push forward with the repairer.
- Use repairer around all sides and slowly ease turf toward the center of the mark. Do not lift the soil upwards.
- Lightly tap down with putter.
- Your completed repair should look like this.

Repairing Divots

- Always start at the back of the mark and push forward with the repairer.
- Use repairer around all sides and slowly ease turf toward the center of the mark. Do not lift the soil upwards.
- Lightly tap down with putter.
- Your completed repair should look like this.

Damage to Greens, Flagsticks, Bags etc.

- Players and caddies should ensure they cause no damage to the green when putting down bags or the flagstick.
- Players should not stand too close to the hole when handling the flagstick or removing the ball.
- Replace the flagstick on leaving the green.
- Don't drop the flagstick on the putting surface as it will cause damage.
- Always lower the flagstick by club...or by hand.
- Avoid damage to surrounds by placing the stick in the center of the cup.
